

What engages patients is no longer a mystery. It's mobile.

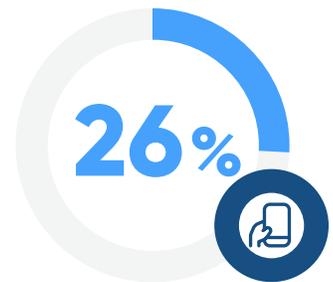

Gozio attracts consumers and delivers immediate value using a proven engagement platform and strategy.

of hospital executives think mobile is key to improving the patient experience.

of patients want a single digital platform to manage their health.

of patients would switch providers for a better digital experience.

Gozio delivers the value healthcare consumers want by:

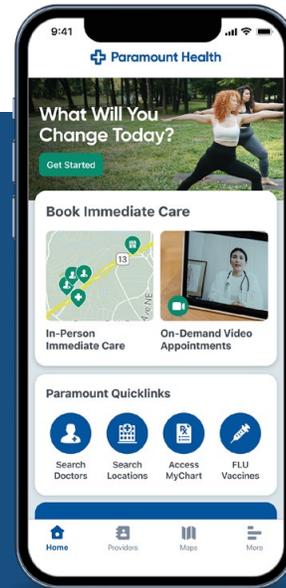

- Providing a single platform that increases access and puts all your digital solutions in one place
- Connecting the digital world and the real world to get people where they need to go
- Creating a premium mobile experience that's proven to attract and retain loyal users

"From our perspective, [the digital front door] is our way of interacting with our patients using a digital platform—UTMC Way, our branded Gozio app. UTMC Way has become our main communication vehicle between our medical center and our patients."

Michael Saad, Senior VP and CIO, University of Tennessee Medical Center

Gozio delivers results

The entire healthcare journey—both in-person and digital—is improved by giving health systems the flexibility to consolidate all their patient-facing digital solutions into one premium native mobile experience. Combined with Gozio’s patented wayfinding and location-awareness, the platform enables all healthcare consumers to confidently navigate their healthcare journey and health systems to achieve their business goals.

100% of clients surveyed would buy Gozio again, according to the KLAS Emerging Technology Spotlight.

CIOs who use Gozio appreciate that they get maximum engagement with minimal lift.

- **Launch quickly:** With the SaaS-based, foundational-framework that Gozio has built, your mobile app can be in your patients’ hands in as little as four to six weeks.
- **Off-the-shelf integrations:** We can quickly plug your digital solutions into the platform.
- **Robot-powered wayfinding:** With no reliance on your infrastructure our wayfinding provides highly accurate navigation from home to the point of care.
- **Virtually no maintenance:** Gozio monitors the platform, is alerted to issues, and quickly works to resolve them.
