

Provider Search & Scheduler Advisor

Better Data. Better Search. Better Access to Care.

symplr Directory is a unified SaaS (Software as a Service) platform for provider data management, data integration and search.

symplr Directory serves as a single enterprise solution to optimize operations and improve the digital experience for all end users, across all touch points.

Extend the value of your Epic EHR and symplr Directory investments with a suite of provider search and access solutions, built for your business, whether you need a customized implementation or a pre-configured solution, or both:

Provider Search Web App

No web development team? – No problem!

- Production-ready, fully branded website deployed in record time
- Built-in responsive UX/UI and web accessibility and open scheduling capability
- Support for multilingual menu options and dynamic user navigation
- Repurpose as needed – modify for narrow networks, specific service lines, population groups and more

Provider Search APIs

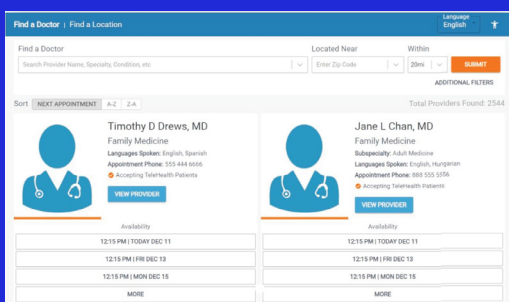

Custom search solution to supercharge your web assets

- Limitless configuration possibilities for search navigation and functionality
- Complete control over business rules, search logic and query results
- Solution for any use case, ambitious scope or edge case challenge
- Future-proof – innovation is baked into our product roadmap

Provider Schedule Advisor
